V International Congress on Food, Biotechnological and Chemical Engineering

The Technological University of Havana “José Antonio Echeverría”, also known as “CUJAE”, and head university center of Cuba in the field of technical sciences and architecture, invites the scientific and academic community of the world to attend the **XIX SCIENTIFIC CONVENTION ON ENGINEERING AND ARCHITECTURE (19th CCIA)** that will be held in our country in The Havana Convention Center from November 26 to 30, 2018.

The V International Congress of Food, Biotechnological and Chemical Engineering (CIIQBA2018) organized by the Faculty of Chemical Engineering at CUJAE will also be celebrated in order to promote new experiences in these fields among specialists, researchers and foreign and national academics in connection with the development of chemical, biotechnological and food processes.

Experts of national and international prestige will give lectures and panel discussions. Oral presentations and poster will also be presented. Facilities for the development of an exhibit fair will be created and specialized visits to centers of interest will be carried out.

The conference will be as well a suitable opportunity for possible common interests with our Faculty in collaboration projects and to sign letters of intention that make viable those interests.

The event covers the topics of previous and new editions, which deal with the most important lines in the technological, educational and scientific development management in the fields of Chemical engineering.

Our Organizing Committee invites you to present your results and scientific and technical experiences to the scientific community and at the same time wishes you the warmest welcome to a city full of history and passion that will celebrate one of the most important events of Engineering in Cuba.

Affectionately,

PhD. Osney Pérez Ones

President of Organizing Committee CIIQBA2018

Principal Topics

This new edition of CIIQBA will be mainly focused on **the use of waste for energy production and data mining applications in process industries.**

Other topics of great interest are:

1. Mathematical modeling, simulation and process optimization
2. Artificial intelligence in Chemical Engineering
3. Synthesis and integration of processes
4. Evaluation of physical and chemical properties
5. Quality assurance in chemical, biotechnological and food processes
6. Culture of recombinant cells and microorganisms
7. Chemical reactions engineering
8. Production of biofuels
9. Enzymatic technology
10. Extraction, separation and purification of bioactive substances
11. Environmental and food biotechnology
12. Fermentations in the biotechnological and food industries
13. Food preservation and processing technologies
14. Technological processes in the production of beverages and liquors
15. Food and nutrition
16. Systems of advanced control of unit operations
17. Deterioration, corrosion and engineering of materials
18. Security management in technological processes with risks of major accidents

Important dates

-Shipment of complete works for evaluation:

Until June 30, 2018

-Notification of final acceptance of works:

Until August 20, 2018

-Sending the final work for publication:

Until July 30, 2018

-Realization of the event:

From November 26 to 30, 2018

"I would still opt for chemical engineering because of the diversity of topics that this field includes"

Prof. Bob Bird,
On these foundations,
2010

The works can be written in Spanish, English or Portuguese.

All authors will be notified of the reception and acceptance or not of the works as soon as they are received and reviewed.

After the date of September 30, 2018 will receive works in its final version, but the Organizing Committee is not committed to its inclusion in the reports.

The presentations of the works will be made in the form of lectures, oral presentations and posters (in vertical format of 70 cm wide by 100 cm high).

Authors must indicate the preferred form of presentation but the Scientific Committee reserves the right to make a final decision.

Registration Fees

The registration fee for the participants (delegates and students) includes the accreditation module (folder, ball-point pen, CD with accepted papers for the event, book of abstracts), participation in academic activities, opening, cultural gala and closing, certificate of attendance and of speaker in case of presenting a work.

Delegate: 250.00 CUC

Undergraduate student: 80.00 CUC

Companion: 70.00 CUC

The registration fee for delegates includes lunch and that of the accompanying persons includes the opening activities, cultural gala and closing of the Convention and a souvenir.

The payment of the registration can be made online through the website www.cciacuba.com. Payment can also be made in cash (CUC) at the time of accreditation at the venue of the event.

Undergraduate students will not be able to pay online, as they must present an official letter from the university at the time of registration to certify their condition.

V INTERNATIONAL CONGRESS ON FOOD, BIOTECHNOLOGICAL AND CHEMICAL ENGINEERING CIIQBA2018

Organizing Committee

PRESIDENT

PhD. Osney Pérez Ones

VICEPRESIDENT

PhD. Anel Hernández Garcés

EXECUTIVE SECRETARY

PhD. Guido Riera González

SCIENTIFIC SECRETARY

PhD. Lourdes M. Zumalacárregui de Cárdenas

MEMBERS

PhD. Osvaldo Gozá León (Executive Commission)

PhD. Eduardo J. García Noa (Sponsorship Commission)

PhD. Anabel Frías Chirino (Communications Commission)

Tech. Alejandro D. Colina Ortega (Communications Commission)
